If a Sequence Name is present, your image will be placed into an Image Sequence. Clear the name or set the Image Number to zero to remove the image from an Image Sequence. Each image within an Image Sequence must be numbered sequentially.

The titles for images in a sequence will be altered automatically when viewed to include the sequence number, but NOT the name of the sequence. You can control where the sequence number is inserted into a title by coding "[]" or "[2 of 3]" into you title. The actual numbers will be inserted in that location instead of at the end of the title.
